

Safety.

MADE BEAUTIFUL.

Introducing Vibe

from LifeValet.

life
valet

Assistive design in an elegant new form.

Vibe was created to end the compromise between elevated safety and individual style, setting a new standard in grab bar design that will truly inspire. Within its sleek modern shape, every element can be customized to a client's exact preference, allowing designers to seamlessly integrate elevated safety into the most tailored residential or commercial interior plan.

Precision engineering in every detail.

In addition to full ADA compliance, Vibe undergoes rigorous testing and quality control, ensuring that its fit, finish and safety performance meet our exacting standards. From high-end residential, commercial and retail to modern medical and care facilities, Vibe is built to provide decades of strength and beauty, maximizing the value of a client's investment.

*Let your
Imagination
run wild.*

Vibe offers a stunning array of three metal finishes, each tile-ready to give designers the freedom to customize look and finish with a surface inlay all their own. In parallel, LifeValet is preparing to introduce a range of elegant glass and metal inlays, each expertly crafted and exclusive to Vibe. No other grab bar offers this level of choice, or creativity.

Create a Vibe that's truly your own.

Vibe's innovative modular design allows for customization beyond anything experienced before. Four stylish configurations, each available in two standard lengths with optional cornering hardware, easily connect to create any shape you can imagine, including unique and complex angles. Nothing is beyond possibility.
